

Smart for Your Company. Good for the Environment.

Since their development more than a generation ago, FIBCs have revolutionized the transport of dry bulk goods of every type. Customized, convenient, and unimaginably strong, FIBCs have become an operational staple the world-over.

But what about used FIBCs? More often than not, a carefully inspected FIBC has the potential to be restored to its original state for use time-and-again.

Our **solution?** A logistically simple, completely thorough bag refurbishing program – strategically designed to get more use from and to extend the life of your FIBCs.

You've got plenty to do. When it comes to your used FIBCs, leave it to Berry Plastics to save you time and money – and to return to you an FIBC as good as new.

Why Refurbish?

Economical. Getting multiple uses from an FIBC means less operational spending – and more to your bottom line.

Cost-Effective. A single bag can be refurbished at a fraction of the cost of a new bag.

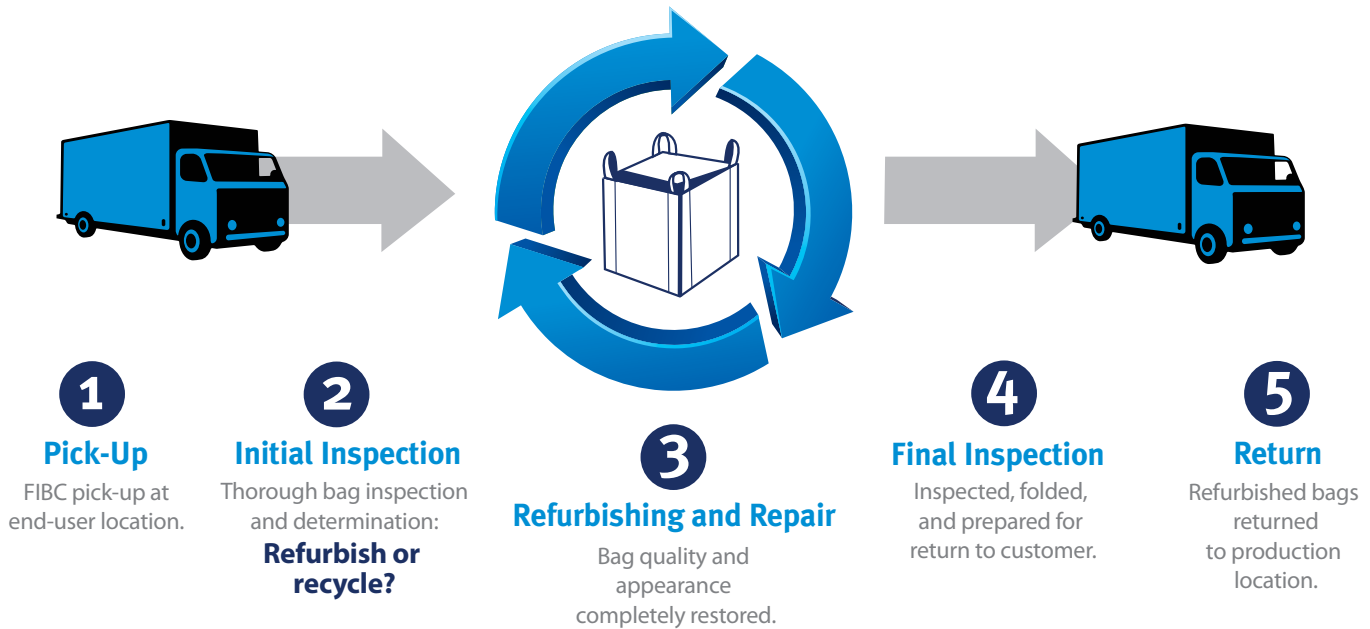

Maximizing Bag Use. An FIBC in good condition can be refurbished, repaired, and used as many as 4-6 times.

Inventory Back-Up. A North American-based bag refurbishing program ensures the availability of bags during operational surges.

Simplifies Operations. Eliminates bulky and costly rubbish removal. Used FIBCs are scheduled for pick-up and refurbishing.

Environmentally Friendly. Refurbishing, repairing, and reusing FIBCs means less trips to the landfill.

Worry-Free Logistics

BAGS BEYOND REPAIR AND REFURBISH ARE 100% RECYCLABLE!

When we say, "Worry-Free Logistics," we mean it. From start to finish, Berry Plastics manages the complete FIBC refurbishing process. Tell us where and when to pick-up and drop-off – *and the rest is up to us!*
